

# GLASBORD® Wall Panels with Surfaseal Finish

It's a dirty world out there. Protect your facility with Crane Composites resilient wall coverings. Our Glasbord with Surfaseal® creates surfaces that deliver unsurpassed hygiene and durability for commercial environments such as restaurants and food processing plants.

GLASBORD EMBOSSED | STONE (15)

Made of fiberglass reinforced plastic (FRP), Glasbord with Surfaseal is extremely moisture-resistant and non-porous. The Surfaseal film finish, found only on Glasbord, provides a barrier that's highly resistant to impact and scratching. Because of it's unique process, the Surfaseal finish will not trap soil or bacteria on the panel. The surface is up to 10 times easier to clean and up to six times more stain resistant than other sanitary wall systems. The sturdy panels, which come in both pebbled and smooth textures, hold up under frequent maintenance cycles, and proven performance at an affordable price point with a 10-year limited warranty.

#### PEBBLED EMBOSSED TEXTURE

# SMOOTH TEXTURE

Patterns and colors are a representation and may not accurately reflect the final product. Please obtain a sample of the product before making a final selection at FRPSamples.com \* Embossed Black, Smooth Gray and Ivory are available in a Class C fire rating only
